

The screenshot shows the mlflow web interface. The top navigation bar has tabs for 'Experiments' and 'Models', with 'Models' being the active tab. Below the navigation bar, there's a 'Registered Models' section. It includes a search bar with the placeholder text 'Filter registered models by name or tags'. Below the search bar is a table of registered models. The table has columns: 'Name', 'Latest version', 'Aliased versions', 'Created by', 'Last modified', and 'Tags'. There is one model listed: 'best_model' with 'Version 1' as the latest version, created on '2025-04-23 23:42:...' by an anonymous user. At the bottom of the page, there's a 'New model registry UI' toggle switch and a pagination bar showing '25 / page'.

Name	Latest version	Aliased versions	Created by	Last modified	Tags
best_model	Version 1			2025-04-23 23:42:...	—
